Wide-awake Procession-Large Delega-

The Wide-awake procession last night was very large, notwithstanding the very unpropitious appearance of the meraling, and the raw atmosphere during the day. We will not attempt to compute numbers, as that can never be done with any degree as that can never be done with any degree of precision, except there be an actual count. The most perfect order was preserved by the procession throughout, and the whole line presented as regular an appearance as if it were composed of well-drilled soldiers. We could not discover, however, in the lamps, any cause for that terror which certain men in the South affect to feel, lest certain men in the South affect to feel, lest they concealluge pikes—instruments known to be most effective in modern warfare, and destined to supersede muskets, Minie rifles, Colt's revolvers, howitzers and thirty-two-pounders; on the contrary, we know, from actual inspection, of several of these lamps and sticks, that it would not be possible to have a large blade concealed in them, nor are the cases and causes sufficient to act as are the caps and capes sufficient to act as helmet and shield to protect the wearer regainst bullets, if they weigh an ounce or more. Therefore, it is well to be calm, and await the course of events, Cincinnati has entertained thousands of the Wide-awakes, and has been annihilated, nor not even suffered a material loss.

The country towns throughout Central,

SEWING-MACHINE AWARDS BY THE AMERICAN INSTITUTE, N. Y.—The Committee of the American Institute, N. Y., appointed at the late exhibition at Palace Garden, to examine sewing-machines, have made a long elaborate and able report, of much interest to the public. Although the utility of this invention is established beyond all question, yet, for the various nurroses of its applicayet, for the various purposes of its applica-tion, ignorance exists as to the particular patent best for a specific purpose. Commit-tees, heretofore, have not discriminated and classified sufficiently. This report is free from these faults. The machines are arranged according to the stitch made, and the purpose to which the machine is to be apolied, in four classes: first, second, third and ourth—a classification indicating the gen-ral order of merit and importance:

eral order of merit and importance:

Class 1 includes the shuttle or lock-stitch machines for family use, and for manufacturers in the same range of purpose and material. The Committee has assigned this class the highest rank, on account of the "elasticity, permanence, beauty and general desirableness of the stitching when done," and the wide range of its application. At the head of this class they place the Wheeler & Wilson Machine, and award it the highest & Wilson Machine, and award it the highest premium. This has been the uniform award for this machine throughout the country for several years, and we think no disinterested person will dispute its justice and pro-

Class 2 includes the shuttle or lock-stitch machines for heavy manufacturing pur-DOSES.

Class 3 includes the double chain-stitch machines. The Grover & Baker Machine is placed at the head of this class. The Com-mittee objects to the stitch made by this ma-chine, inasmuch as it consumes more thread chine, inasmuch as it consumes more thread than any other stitch, and leaves a ridge projecting from one side of the seam. This, in the Committee's opinion, must usually impair the durability of the seam, and often the beauty of the garments or other articles so stitched, though some of the machines making this stitch can be used very successfully for embroidering purposes.

Class 4 includes the single-thread tambour or chain-stitch machines. The tendency of this stitch to ravel, the Committee considers an objection so serious that they

AMUSEMENTS.

Pare's OPERA-BOUSE.—A small audience attended the Colson concert last night. The time is out of joint for musical concerts. The labor of saving the Union is just at this time too severe to allow people to be happy. Treason, stratagems and spoils are too rampant to permit any music in the soul. Sectional discord overcomes divine harmony. Besides, the Wide-awake procession last night gave a cheaper entertainment.

Yet within the Opera-house, sacred from the infernal noise and confusion, a select

Yet within the Opera-house, sacred from the infernal noise and confusion, a select audience epoyed a fine concert. Madame Colson was, as she can not help being, divine. We are weighing our words now. If she is not divine, the imagination fails to reach that quality. The enthusiasm of a Cincianati audience is irrepressible whenever she appears. Miss Kellogg has a sweet voice, highly cultivated, and was well received. We think Brignoll never sang better.
